

Horizon Falcon 2 Sector Mesh Coil

Horizon [Falcon 2 Sector Mesh Coil](#) - Horizon - [Mesh Coil](#) - 3pcs/Pack

The new fan-woven mesh heating wire can maximize the airflow of the bottom part of the coil and when combined with the heating of the top of the coil, can force the vapor to compress upward, forming a vapor compression path and therefore maximizing flavor density.

[Horizon Falcon 2](#) Sector Mesh Coil is specially designed for Horizon Falcon 2 Tank, coming with 0.14ohm resistance. The tapered structure of the coil forms a bottom-up vapor compression path, making flavors denser and vapor smoother. The new fan-woven mesh

heating wire can maximize the airflow of the bottom part of the coil and when combined with the heating of the top of the coil, can force the vapor to compress upward, forming a vapor compression path and therefore maximizing flavor density.

Parameters:

Coil Resistance: 0.14ohm

Wattage:70-75W

Quantity: 3pcs/pack

Fit For: Horizon Falcon 2 Sub Ohm Tank

Horizon Falcon 2 Sector Mesh Replacement Coil comes with:

1 x Falcon 2 Sector Mesh Coil 0.14ohm 3pcs
