Frequently Asked Questions (FAQs)

Q: What is ISO 9001:2008 certification, and how is it different from ISO 9001:2015?

A: ISO 9001:2008 certification is a standard for quality management systems focused on customer satisfaction and consistent quality. ISO 9001:2015 introduced updates like a focus on risk management and organizational context. Both standards prioritize quality, but ISO 9001:2015 incorporates newer management practices.

Q: Why should I work with an ISO 9001:2008 certified company?

A: Working with an ISO 9001:2008 certified company ensures high-quality products or services, consistent processes, and a commitment to continuous improvement. This certification demonstrates the company's dedication to maintaining global quality standards.

Q: How can I verify a company's ISO 9001:2008 certification?

A: You can verify a company's certification by checking with the third-party certification body that issued it. Reputable certifying bodies maintain databases where you can validate the certification's authenticity and status.

Q: Does ISO 9001:2008 certification guarantee high quality?

A: Yes, ISO 9001:2008 certified companies in india indicates that a company follows quality management practices, it does not guarantee quality by itself. However, certified companies

are more likely to maintain consistent quality due to established processes and commitment to standards.

Q: Can companies with ISO 9001:2008 certification work in international markets?

A: Yes, ISO 9001:2008 certification is internationally recognized, making certified companies eligible to work in global markets, where quality management standards are essential for entry.

Q: How does ISO 9001:2008 certification benefit customers?

A: For customers, ISO 9001:2008 certification means they can expect consistent quality, timely deliveries, and better service from certified companies, enhancing overall satisfaction and trust.

Q: Is ISO 9001:2008 certification still valid, or do companies need to transition to ISO 9001:2015?

A: While ISO 9001:2008 was replaced by ISO 9001:2015, companies may still follow the principles of the 2008 standard. However, certification bodies encourage companies to upgrade to ISO 9001:2015 to meet the latest quality management requirements.

Conclusion:

ISO 9001:2008 certified companies in India demonstrate a strong commitment to quality management and customer satisfaction, which is crucial for maintaining competitive standards both domestically and internationally. Despite the transition to ISO 9001:2015, these companies uphold the core principles of consistent processes, effective management practices, and continuous improvement. Cureton Biotech exemplifies this commitment to quality, ensuring that all of its products meet rigorous standards. With a focus on delivering safe, reliable, and high-quality pharmaceuticals, Cureton Biotech stands as a trusted partner in the healthcare industry, both in India and globally.
