When it comes to material handling, you need a forklift that delivers power, comfort, and reliability without compromise. The [PowerLiftX35 LPG Forklift](#) is designed to meet these demands, offering world-class safety features, superior performance, and operator-friendly ergonomics. Whether you're working in a warehouse, construction site, or manufacturing facility, the PowerLiftX35 is built to excel in the toughest environments.

Unmatched Power and Durability

The PowerLiftX35 is a 3.5-ton LPG forklift engineered for rugged reliability. With a lifting capacity of 7,716 lbs, this powerhouse is built to handle heavy loads with ease. Its robust construction ensures a long service life, while high-quality components reduce wear and tear, keeping your operations running smoothly. The PowerLiftX35 is more than just a forklift—it's a long-term investment in productivity.

Enhanced Productivity

The PowerLiftX35 is designed to maximize efficiency and performance. Key features include:

- **Wide-View Mast:** Provides exceptional visibility of the forks in any position, ensuring precise load handling.
- **Tight Turning Radius:** Enhances mobility in confined spaces, making it ideal for busy worksites.
- **Finger Control Shifting:** Optional finger controls allow quick and easy shifting between forward and reverse, saving time and effort.

These features work together to streamline operations, reduce downtime, and boost overall productivity.

Safety First

Safety is a top priority with the PowerLiftX35. Its **Operator Presence Sensing (OPS) system** ensures that the forklift and forks remain stationary when the operator is not seated. The system activates through a seat switch, disabling movement if the operator leaves the seat. This prevents accidental operation and enhances workplace safety. Additionally, the **Active Mast Function with Automatic Fork Leveling** ensures smooth and controlled lifting, even with heavy loads.

Operator Comfort and Ergonomics

Long shifts can take a toll on operators, but the PowerLiftX35 is designed with comfort in mind. Key ergonomic features include:

- **Adjustable Suspension Seat:** Equipped with lumbar support for all-day comfort and reduced fatigue.
- **Spacious Operator Area:** Provides ample room to move, enhancing comfort during extended use.

- **Hydraulic Controls:** Ergonomically mounted for “eyes forward” operation, allowing operators to focus on the task at hand.

The forklift’s design also prioritizes visibility, with a lower instrument panel, relocated display, and optimized mast width for clear views in all directions.

Ease of Use and Maintenance

The PowerLiftX35 is as easy to maintain as it is to operate. Key features include:

- **Integrated Monitoring System:** Simplifies troubleshooting and servicing, reducing downtime.
- **Easy-Lift Engine Hood:** Provides quick access to the engine for maintenance and repairs.
- **No-Tool Floorboard:** Can be removed in seconds for faster servicing.
- **Swing-Down LPG Tank Bracket:** Allows for safe and quick tank changes, minimizing operator effort.

These features ensure that the PowerLiftX35 remains in peak condition, keeping your operations running efficiently.

Why Choose the PowerLiftX35?

The [PowerLiftX35 LPG Forklift](#) is more than just a piece of equipment—it’s a game-changer for your business. With its powerful performance, advanced safety features, and operator-focused design, it’s the perfect choice for businesses looking to enhance productivity and reduce operational costs. Built to last and designed for comfort, the PowerLiftX35 is the ultimate forklift for demanding environments.

If you’re ready to take your material handling to the next level, the PowerLiftX35 [LPG Forklift](#) is here to deliver. Contact us today to learn more about how this powerhouse can transform your operations.
