

PHARMA FRANCHISE COMPANY FOR ANTIBIOTIC RANGE

The Augmented Growth of the Antibiotic Pharmaceutical Market

Globally the antibiotic drug market was valued at USD 45.31 billion in 2018 and is anticipated to grow at a CAGR of 4.0% over the forecast period. In 2018 the wide-spectrum antibiotic segment is dominating the market with the highest share of 59.90%. The increasing cases of infectious diseases along with imbalance demand and supply of antibiotics is driving the growth of this market. Also, the rise in incidences of pneumonia, urinary tract infections, and bloodstream infections are expected to foster the usage of antibiotics. Furthermore, the government initiatives such as (GAIN) Generating Antibiotics Incentives Now are anticipated to expedite the approval process.

Quality-Oriented Antibiotic Drug Range At Biocorp

Antibiotics drugs are an indispensable part of human healthcare. They have been utilized by humans since 1928 and have grown into a multi-billion dollar market. Antibiotic drugs treat infectious disease caused by aerobic and anaerobic bacteria, gram-positive and gram-negative. These drugs kill the growth of bacteria and destroy the ability to reproduce. Various pharmaceutical companies are dealing in antibacterial range. Biocorp Lifesciences is one of them who is a well known [Pharma Franchise Company for Antibiotic Range](#). The company is engaged in manufacturing, supplying and trading an extensive range of antibiotics.

From our wide portfolio, we have listed some of the antibiotic tablets, injections, and dry syrups:

Tablets

We have a wide range of antibiotic tablets that are DCGI and FSSAI approved. Our products are examined by the quality department before offered to the final customers and clients. Go through our high-quality antibiotic tablet range:

- **Amoxycillin & Potassium Clavulanate Tablets IP** – Amoxycillin is a penicillin antibiotic that prevents the bacteria in the body. Amoxycillin and Clavulanate is amalgamation medicine used for the treatment of many various infections caused by bacteria, such as pneumonia, bronchitis, urinary tract infections, ear infections, sinusitis, and skin infections.

- **Cefuroxime Axetil Tablets IP** – Cefuroxime treats different bacterial infections. This medication is also called cephalosporin antibiotic. It stops the growth of bacteria. This antibiotic is only prescribed to treat bacterial infections. It doesn't work on viral infections like common cold and flu. It is also used to treat tonsillitis/pharyngitis caused by Haemophilus influenza.
- **Cefpodoxime Proxetil Dispersible Tablets** – It is also called cephalosporin antibiotic. This antibiotic medication works by destroying the cell walls of bacteria. Cefpodoxime is used for the treatment of Otitis Media, that is an inflammation of the middle ear caused by Pseudomonas aeruginosa and Streptococcus pneumonia.

Injections

Our antibiotic injection range is quite effective in treating various bacterial infections. The researchers of our company are dedicated to bringing the new and improved injection antibiotic range to satisfy the customers. Here is our injection range:

Ceftriaxone Injection IP – Ceftriaxone injection is an antibacterial medication that is used to treat skin and skin structure infections, respiratory tract infections, pelvic inflammatory disease, bacterial septicemia, urinary tract infections, joint infections, and lower respiratory tract infections.

Common side effects of Ceftriaxone:

- diarrhea
- rashes
- nausea

- upset stomach
- headache
- dizziness
- vomiting

Dry Syrups

Dry Syrups are the powder mixtures that are provided by us in manifold range. They are mainly produced for pediatric use. We have a variety of antibiotic dry syrups, some of those includes:

- **Amoxycillin & Potassium Clavulanate Oral Suspension IP** – This antibiotic oral suspension treats only bacterial infections. You must consume this medication until the full prescribed amount is finished. Shake the bottle well before consuming each dose.
- **Cefixime Oral Suspension IP** – This drug is widely used to treat various bacterial infections. It basically works by preventing the growth of bacteria.
