

# Get FREE 2025 UCAT Score Calculator: View Cutoff & Interview Call Predictor Now!

Our UCAT Calculator - Interview Call Predictor helps estimate your chances of receiving an interview offer from various universities based on your UCAT score and past UCAT cut-offs. This data-driven tool analyses historical trends from previous applicants, giving you an instant estimate of where you stand.

This tool is trusted by 50k+ students who want a quick and accurate prediction without manually checking university-specific UCAT Score requirements. Whether you're applying for medicine or dentistry, our predictor simplifies the process, giving you the confidence to plan your next steps.

For universities that have not historically conducted UCAT Test, we have estimated the probable UCAT cutoff for 2025 using factors such as university prestige, demand, and applicant trends to provide the most realistic prediction possible.

On average, dentistry UCAT cut-offs tend to be lower than medicine cut-offs, typically by 150–200 points, though this varies by university. Our UCAT Score Converter - Interview Predictor accounts for these differences to offer the most accurate interview call estimate for both medicine and dentistry applicants.
