

Images gallery with new interface

Browser pictures in your notes faster using the arrow buttons

Many our users put a lot of images in their notes and now they could be easily browsed using images gallery new UI.

Gallery opens automatically for visitor after clicking on the image that links to other image (if you upload any graphic to the website you don't have to apply any additional settings). Now, all the visible images can be viewed one by one using arrow buttons.

You can try by clicking on one of the images below:

User profile photos on their profile pages can be displayed in the same way.
