

Importing notes saved in browser

If you happen to create articles on JustPaste.it as an anonymous user, you may want to import them later to easily manage on your account.

Today we have improved "[Import notes saved in browser](#)" tool. You're now able to select which articles you want to import. You can also remove information about created articles from your browser.

JustPaste.it share text and images the easy way [Add note](#) [JustPasteIt](#)
