

# IOSH WORKING SAFELY course/training in Riyadh, Saudi Arabia (KSA)

## IOSH Working Safely at Saudi Arabia

IOSH Working Safely is a specially formulated course for workers who don't have basic understanding on the importance of creating safe and healthy work environment. Designed and developed by the health and safety experts from IOSH, a UK-based educational board, the course also helps working professionals improve awareness and skills involved in assessing, managing and controlling risks and dangers at workplaces.

The renowned occupational health and safety course is available in Saudi Arabia at E-Growth Training Center, which is one of the few IOSH-affiliated centres in the world. For the benefit of millions of workers who are exposed to dangerous and unhealthy occupational standards, E-Growth Training Center has made IOSH Working Safely affordable in Saudi Arabia.

## What you will learn?

Working safely is a short term course for workers belong to any level and any sector who want to have basic understanding of health and safety. The course covers all important aspects of health and safety in work environment and how to create safe, secure and healthy standards for self and others at work places through following some simple mechanisms. The course is classified into four broad modules, such as:-

- Defining hazard and risk
- Identifying common hazards
- Improving safety performance
- Protecting our environment

Who should attend?

Since the course provides foundation on various health risks and hazards due to unplanned and unhealthy work environments, anyone who wishes to understand the importance of basic safety for self and fellow workers can join the course. The course is ideal for trainees, office and other non-industrial staff, machine and process operators, supervisors/managers who don't have formal safety training and aspiring students and working professionals who want to begin a career in HSE domain.
