

# What Should You Do If Your iPad Screen Is Cracked?

## **Check Your Warranty**

First, check to see if your iPad is covered by a warranty. AppleCare+ has coverage options that can help you get your screen repaired for less money. If your iPad's warranty has expired or you don't have one, you'll have to look for another repair option.

## **Back It Up**

Make a backup of your iPad before taking it anywhere or sending it in for repair. Professionals can sometimes repair your iPad, but mistakes can happen, and your data will be lost.

## **Understand The Type of Crack**

While some cracks are minor hairline cracks that are primarily cosmetic, others are more serious, affecting touchscreen functionality and potentially leading to a crack that spreads across your screen.

## **Schedule a Services at Campus Phone Repair**

After you've completed the preceding steps, the next step is to entrust your iPad to a trustworthy group. At Campus [Phone Repair](#), we provide iPad screen repair services that are completed by a knowledgeable and experienced team.
