Cardfight!! Vanguard vs. Other TCGs: What Makes It Unique?

01

Ride System and Grade-Based Mechanics

One of the defining features of **Cardfight!! Vanguard** is its ride system, where players "ride" higher-grade units over their existing cards to build up their vanguard.

02

Single Vanguard Focus vs. Multiple Summons

Vanguard places a strong emphasis on the central vanguard unit, supported by rear guards.

03

Drive Checks and Trigger System

MTG and Yu-Gi-Oh! where strategies are often predetermined, Vanguard maintains an exciting, luck-based tension that keeps games dynamic.

04

Shield Values and Guarding

Defensive play in Vanguard is also unique. Instead of relying solely on counterplay mechanics like spell negation or trap cards Vanguard features shield values on cards.
