The Vineland-3 Adaptive Behavior Scales Form evaluates an individual's adaptive functioning in daily life. Designed for individuals aged zero to 90, this comprehensive assessment measures . Vineland-3 scores must be submitted for beneficiaries ages 0 years through 90 years as part of ABA treatment requests under the ACD. What are the submission requirements? ABA . The comprehensive interview, parent/caregiver form, and teacher form includes information about a child's adaptive behaviors, maladaptive behaviors, and compares domain-level strengths and weaknesses. Interview and Parent/Caregiver Forms: birth through age 90+. Teacher Form: ages 3 through Administration time varies depending on the form used, age of the examinee, and whether the optional Motor Skills and/or Maladaptive Behavior domains are included. This form asks about the adaptive behaviors of the child or adult on whom you are reporting. Adaptive behaviors are the day-to-day things that people do to communicate, take care of themselves, and get along with others.
