

How to Backup and Restore Your Family Tree in FTM 2024

If you're using [Family Tree Maker software](#), protecting your data is essential. Whether you're upgrading to a new computer, troubleshooting a problem, or simply safeguarding your research, knowing **how to backup and restore your family tree in FTM 2024** is a must. This guide will walk you through the easy steps to ensure your genealogy data stays safe.

Why Backup Your Family Tree in FTM 2024?

Genealogy research can take years to build. A backup ensures that your hard work is never lost due to:

- System crashes
- Software updates
- Accidental deletions
- Computer replacements or upgrades

That's why [FTM 2024](#) includes built-in options for both manual and automatic backups.

How to Create a Backup in FTM 2024

Creating a backup is quick and easy with **Family Tree Maker software**. Follow these steps:

1. **Open FTM 2024** and load your family tree.
2. Click **File > Backup**.
3. Choose the location where you want to save the backup.
4. Select options like "Media Files," "Chart Files," and "Research Logs" if needed.
5. Click **OK** to save the .ftmb (Family Tree Maker Backup) file.

Pro Tip: Save your backup to an external drive or cloud storage for added protection.

How to Restore a Backup in FTM 2024

When you need to restore your family tree:

1. Launch **FTM 2024**.
2. Go to **File > Restore**.
3. Browse and select the previously saved **.ftmb** file.
4. Choose a name and location for the restored file.
5. Click **OK**, and your family tree will be restored.

Your tree, media, and all associated files will be restored to their previous state.
