

More Evidence Israel Involved in Fukushima Disaster

[Journalist Accuses Israel of Fukushima Sabotage](#)

Update 4/1/2017-a

Source: <http://82.221.129.208/baaasepagel7.html>

Israel Nuked Fukushima - Henry Makow - Former NSA analyst, Jim Stone, argues that there was no mag 9.0 earthquake. The tsunami was caused by nuclear bombs in the sea and the Fukushima explosion and meltdown was caused by mini-nukes hidden in cameras installed by an Israeli security firm. The motive: punish Japan for offering to enrich Iranian uranium and straying from Illuminati diktat. This website reserves judgment but offers this introduction by James Farganne in the spirit of free discussion.

<https://www.henrymakow.com/theargumentfukushimasabotage.html>

Another reason for Israel to destroy Fukushima is in the Fukushima report:

Japan agreed to enrich uranium for Iran. This was printed all over the third world press but as far as I found, was not published in the Western media, obviously because it might be enough to make a few people scratch their heads over Fukushima. This was part of the original Fukushima report original release, and is still in it now.

Robot can't find melted fuel at No. 1 reactor of Fukushima plant

Nothing came in on this topic through the mail,

But a very popular forum wanted me to explain why Israel would destroy Fukushima. Here is the short answer: Japan was rebellious and said no to gifting the World Bank 160 trillion yen. I don't know if Japan knew Israel could follow through on a blackmail threat but Israel did, and the result was a weak earthquake lied up to a 9.0, a nuclear tsunami, and destruction of Fukushima by an Israeli security team Tepco let into the facility in the months leading up to the disaster. **IMPORTANT: The week before the disaster, the entire Israeli security team, which consisted of 12 people, went on vacation to Israel and left the security duties to Japanese people they hired for that time period.** Very convenient.

The security firm's star product was a 3d stereoscopic camera that weighed over a thousand pounds and was mysteriously identical in scale and form to a gun type nuclear weapon. The cameras that were outside the facility monitoring the perimeter were legit, and had cameras in the barrel that occupied the entire barrel. But the camera that was confirmed to have gone under reactor three, in the torus area, had surface mounted cameras that did not penetrate the barrel. It was, to scale, an exact functioning replica of a gun type nuclear weapon. We all saw the results, and now, SIX FREAKING YEARS after the disaster, they finally got a decent look at reactor 1 and confirmed nothing happened to it, only the containment was destroyed. This can be explained by how robustly reactors are built. **CURIOSITY: IF THERE WAS NO BREACH, WHY IS EVERYTHING LETHALLY RADIOACTIVE?** Obvious answer: A failed gun type nuke went off there. And at reactor 2 then. And reactor 4, which blew itself to heaven despite not even having a core in it had a better functioning nuke. Obviously ALL the blasts were follow up on a blackmail threat, with the blast at 3 putting on the best show.

There is no conceivable way hydrogen gas did it, because 1. all the containments were completely purged with nitrogen to eliminate ALL explosion potential, and 2. Fukushima was equipped with a system that got rid of hydrogen if it did develop, and that system was functioning all the way through the disaster, and 3. The inner containments at all reactors were completely destroyed, and ALL inner containments had concrete in the bottom portion that was between 12 and 18 feet thick. All reactors had this section of the containment shattered. There is no way in hell a little loose hydrogen gas would ever do that.

So that leads us right back to square 1: Cameras that were identical in scale and form to gun type nuclear weapons, and inexplicable lethal radiation left behind at reactor 1, despite it now being proven no radiation ever escaped the reactor. If they ever do manage to get a look at that camera, and it is completely vanished, and word gets out to the general public, Israel is gonna have a Japanese hot sauced squid up it's @ss.

This is not hoax or assumption. The Fukushima report was fully endorsed by 1 of the 4 engineers who designed reactor 3. I interviewed him for two hours and he said the report was accurate, but he could not agree Israel would ever do it. He got angry with that so I did not push it. He was 89 years old. I can't give his name out.

All of what I talk about is in the Fukushima report and was properly documented with syntax as accurate as an old school machine coded computer program. That report is a masterpiece. Unfortunately, revisionists have wiped out most of the referenced materials because they just could not have that report be as it was, so well documented. But the main points that report makes are still 100 percent accurate:

1. There is no way Fukushima could have been destroyed by a tsunami, even if the story unfolded the way the official story did. There were too many backup systems and endless safety backups and only one layer of that was gone with the generators. There were so many other redundant systems that the official story is a standing lie, nothing could have possibly happened, even with the official story line. To have the worst possible outcome at all reactors, even at reactor 4, which was completely dis-assembled and had no core is beyond laughable, it is an outright rotten and transparent falsehood. Obviously that facility was destroyed with weaponry.

2. The earthquake was only a 6.6 and was centered 100 kilometers inland. People said it did not feel natural. There were no significant structural collapses in all of Japan. The only building that fell was an old welfare shelter located at the true epicenter, inland. Out at sea, where the tsunami originated, peak seismic intensities only hit 5.3

Anyway, Claudia is sitting here at 1:30 AM ready to pass out. It is time for bed.

Emergency workers were confused by the nature of the casualties, which were all water related, and had none of the lacerations and broken bones and crushing injuries that normally accompany an earthquake. This is because there was no significant earthquake and no seismically collapsed buildings, only tsunami damage.

3. The U.S. navy was in the area placing submerged "sonobouys". Obviously then, one or more sonobouys that was dropped into the Japan trench was a bottom seeking nuclear weapon, that went off to trigger the tsunami. With the earthquake a proven 6.6 that was lied up

by the media but recorded as a 6.6 by all the Japanese seismic stations, obviously the tsunami, which originated well over 100 miles from the epicenter of a relatively weak inland earthquake was produced by the properly timed detonation of a submerged nuclear weapon. All of this is impeccably documented in the Fukushima report, linked at the top of this page by clicking the image of Maga BSP's "OWL". I got the complete seismic record on top of the original seismogram from the true epicenter, all the reactor diagrams, all the photographic proof in the world that the tsunami was not natural, and early on I had the full Sendai damage report that proved there was no significant earthquake, only a tsunami. That report was subsequently destroyed so it could not be referenced. It was simply too damning.

Update 4/1/2017 b

Nothing came in on this topic through the mail,

But a very popular forum wanted me to explain why Israel would destroy Fukushima. Here is the short answer: Japan was rebellious and said no to gifting the World Bank 160 trillion yen. HEY ISRAELI MOSSAD: DEAR DIMONA DOZEN: GUESS WHAT?

A NEW EXPEDITION HAS PROVEN REACTOR 1 IS SO INTACT IT CAN BE PROVEN IT DID NOT LEAK EVEN A MICROSIEVERT OF RADIATION. THAT MEANS YOU ARE BUSTED FOR SETTING OFF A NUKE THERE NOW, JUST LIKE YOU DID TO REACTOR 3. THAT IS THE ONLY WAY NUCLEAR MATERIAL TO MAKE THE CONTAINMENT LETHAL COULD HAVE GOT THERE. GEE, I GUESS YOUR BOMB WAS A SCREW UP. A "NUCLEAR SPITTER" TO THE 6TH DEGREE. HOW ABOUT THAT NICE PHOTO OF THAT BETTER WORKING BOMB YOU PUT UNDER REACTOR 3 THAT THIS WEB SITE GOT AHOLD OF AND HAS HAD POSTED FOR 6 LONG YEARS? YOU GOTTA LOVE IT!

YEAH, SO SCREW WITH THIS WEB SITE. MAYBE YOU CAN DO THAT RIGHT AFTER YOUR BRILLIANT ISRAELI BOMB TECHS SCREWED UP THE BIG JOB!

REACTOR 1: THE PROBABLE REASON FOR THE NEAR TOTAL IF NOT TOTAL MESSAGE BOX CENSORSHIP, AND FAKE MAILINGS THAT WERE TAGGED AS COMING FROM THIS WEB SITE

I DREW A HUGE CONNECTION ABOUT REACTOR 1 THAT I DID NOT FIGURE OUT AT THE TIME OF THE FUKUSHIMA REPORT, AND THEY WANT THIS SITE WRECKED OVER IT. SO I WILL RUB THEIR FACE IN IT AGAIN. HERE IT IS:

At the time of the Fukushima disaster, they kept talking about high pressures in reactor 1, which I figured were bullshit because I thought the reactor was driven to explosion by the Stuxnet virus. That would explain the wrecked containment. EVIDENTLY IT WAS NOT. NEW EVIDENCE SAYS THE ENTIRE REACTOR SYSTEM REMAINED PERFECTLY SEALED. NOTHING GOT OUT OF IT. AND THIS CAN KILL ISRAEL, BECAUSE THE ENTIRE CONTAINMENT IS COATED IN RADIOACTIVE CRAP, YET NOTHING IN THE REACTOR SYSTEM EVER BREACHED TO LET IT OUT. THIS IS PROVEN BY THE CONTINUOUS HIGH PRESSURES STILL BEING MAINTAINED IN REACTOR 1, PRESSURES ABOVE 2,700 PSI. IF ANY PROBLEM HAPPENED TO THAT REACTOR THAT CAN EXPLAIN THE HIGH RADIATION, THE HIGH PRESSURES WOULD NOT BE PRESENT. And having hydrogen gas destroy such a robust structure is a laughable ruse.

Unlike what crap web sites like ENE news say, nuclear reactors are not made out of tinfoil. They are by far the most robust machines made by man. And the piping going to them is the most robust, thick and strong piping made anywhere for any job in the world. It would be possible to blow away a concrete containment surrounding a reactor, and not have a breach anywhere in the reactor system. **If this is what happened with a nearly failed nuclear weapon at reactor 1, Israel could be in deep sh*t.**

FACT: THE REACTOR 1 CONTAINMENT IS LOADED WITH LETHAL RADIATION. FACT: REACTOR 1 NEVER LEAKED. FACT: RADIATION AT REACTOR 1 IS IMPOSSIBLE, UNLESS SOMETHING ELSE PUT IT THERE. WHAT COULD PUT IT THERE? A MAGNA BSP OWL, WITH A SERIAL NUMBER TWO NUMBERS LOWER THAN THE ONE THAT WENT INTO REACTOR 3.

I got such solid proof that Israel put a nuclear weapon in the inner containment of reactor 3 that it is IN THE PICTURE LINK TO THE FUKUSHIMA REPORT AT THE TOP OF THIS PAGE. IT IS HUGE, TWO STORIES TALL. GUN NUKES ARE HUGE. AND YES THEY WOULD FIT IN THE INNER CONTAINMENT BECAUSE THE REACTORS ARE SO HUGE THAT A TWO STORY TALL CAMERA WOULD NOT EVEN BE ABOVE THE TORUS BELOW THE REACTOR. THEY FAKED THE JAPS INTO THINKING THAT WAS ONLY A CAMERA! I never got proof they got nukes into reactors 1,2, and 4. But with the current radiation readings in the containment of reactor 1 being impossible with no breach in the actual reactor system whatsoever, proven by the high pressures in that system even now, there could not possibly be another source for that radiation. **Recently (last week) they got a camera with a radiation sensor into reactor 1, below the reactor. It did not melt through but there was a lot of radiation. If there are high pressures in the system, and there is no melt through, that high radiation came from somewhere else, LIKE A SUPER CRAPPY NUCLEAR WEAPON THAT DID NOT GO OFF VERY GOOD, BUT THREW RADIOACTIVE CRAP EVERYWHERE.**

AFTER I POSTED THAT, THERE HAS BEEN NOTHING BUT HELL FOR THIS WEB SITE.

This is a Magna BSP Owl camera. the one that went below reactor 3 had surface mounted cameras that did not extend into the gun barrel. This is clearly shown in the full resolution photos that are in the Fukushima report

Obviously this design format is a setup for getting nuclear weapons into sensitive areas.

1. Killed off message window.
 2. An apparent halting of all donations.
 3. A fake mail campaign, where people started getting mails from this web site that this web site never sent! WTF IS UP WITH THAT? I have not sent a single mail for 4 months and the last one was to WAYNE, THE ONE BEFORE WAS TO WAYNE, AND THE 10 BEFORE THAT SPANNING YEARS WERE TO WAYNE. He's the only one I even bother sending mail to because the censors can't get away with blocking confirmed communications. I can get Wayne on the phone! Bottom line? This web site NEVER SENDS OUT MAILS. And if you get one from this web site, it is FAKE.
- Why would they get so pissed off about a new revelation at reactor 1 that they had to attack this site so hard over it if it was not true? ENE news and Rense get to say whatever they want about Fuku and they never suffer any consequence at

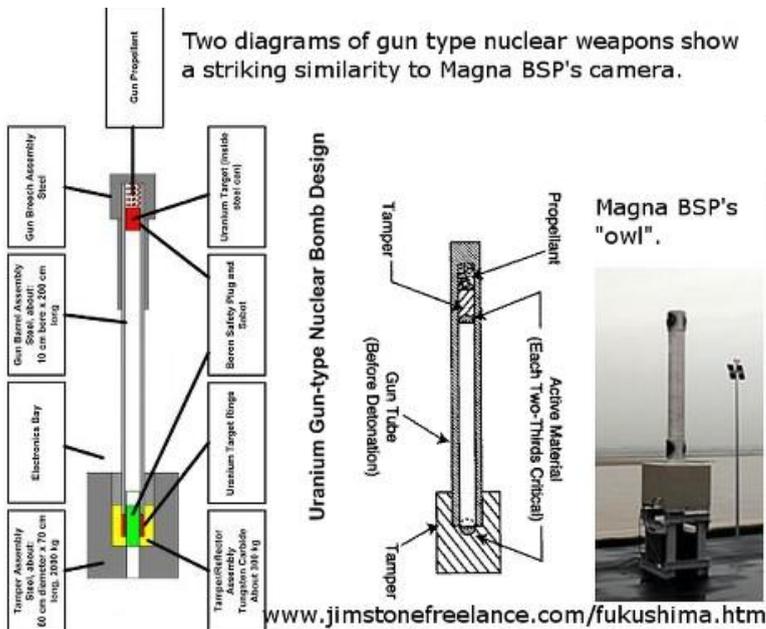

all because it is all total BULLSHIT. But no, this web site gets punished. WHY?

I'll tell you why: Because if there is ever a real investigation of reactor 1, and they discover there was no breach AT ALL, and a GDEFFIN HUGE "camera" is totally missing it is going to irrevocably indict Israel for causing the Fukushima catastrophe. And if Rense really is genuine opposition to the Jews he DAMN WELL OUGHT TO AT LEAST MENTION THIS.

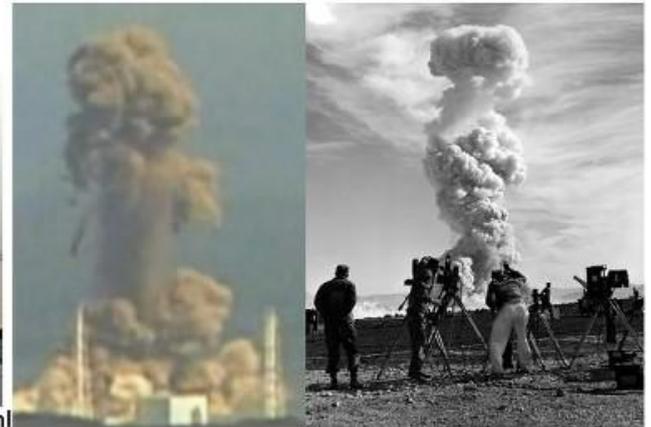

Two diagrams of gun type nuclear weapons show a striking similarity to Magna BSP's camera.

Even at meltdown a boiling water reactor cannot go critical like a nuke and will not explode; it just melts.

The blast at Fukushima #3, which Israeli firm Magna BSP "secured" with one of their cameras, bears a striking similarity to a nuclear weapon test.

Magna BSP's "owl".

And there is 100 percent precedent for this - because the planting of explosives in a Swedish nuclear facility got caught and published only a year after Fukushima. This web site is, as far as I know, the only alt media site that covered that. Gee, I wonder why, when it even got published on the inside fold, page 42 in many European MSM publications where such news rightfully belongs if the objective is to claim informing the public while keeping it all secret. It is the job of the alt media to find stuff like that. The Israelis probably have nuclear blackmail threats everywhere. **CONSIDER THIS: SWEDEN'S CULTURAL SUICIDE MAY BE HAPPENING BECAUSE THE GOVERNMENT DOES NOT WANT A REACTOR TO GET BLOWN SKY HIGH, AND THEY HAVE TO STAY SHUT UP ABOUT IT AND DO THE WILL OF THEIR NEW MASTERS.**

Anyway, enjoy the E-mails. I am sure they will be fun if you try to read them. **Don't open them!**

DEAR TROLLS: What would you rather have posted? This, rubbed in your face again, or a few *legitimate* messages from readers? Don't make it tough on yourselves!
