

ALERT: Radiation Hazards of New 5G Microwave Technology

Under development by Israel, 5G cellular technology will blanket planetary life with ultra-high microwave frequencies.

Article: <http://wp.me/p2FjTj-7XR>

(NaturalHealth365) The 5G revolution is rushing toward us and it will bring a whole new era of harm from ultra-high microwave frequency radiation. And those who raise their voices against the danger to our health and our human rights to safety have been the subject of harassment, intimidation and attempts to silence them.

DAVE HODGES: The New 5G Network Is Deadly - Why Is This Dangerous Technology Being Forced Upon America?

In my **radio interview (video)** with Virginia Farver, we explored this question. We both agree, that there are two components to underlying motivations associated with the use of such a dangerous product.

<http://www.thecommonsenseshow.com/2016/08/09/the-new-5g-network-is-deadly/>

India and Israel have agreed to work jointly on development of fifth generation (5G) telecom technologies, sources said.

The matter was discussed during the visit of Telecom and IT Minister Kapil Sibal to Israel last month, they said. Sibal and his Israeli counterpart Gilad Erdan in a meeting agreed that both the countries can cooperate on exploring the possibilities of standard formulation, development and manufacturing in the area of 4G and 5G telecom technologies.

"Israel has technology and innovation, India has the capital and market. The two areas which emerge out of discussion related to telecom were reducing roaming charges between India and Israel and exploring the possibilities of standard formulation, research and development, and manufacturing in the area of 4G and 5G," a DoT official said.

How a Telecom Bill is About to Strip Local Authority

March 24, 2017 - Reinette Senum

On March 17th, the City of Nevada City received an alarming letter from the League of California Cities (LCC). The League, a consortium of California cities that influence policy decisions, sent an [Action Alert](#) putting all cities on notice about a **bill that would ultimately usurp all local control in regard to wireless and small cell telecommunications.** i.e. cell towers and antennas installations.

As stated in the letter, “This proposal would prohibit local discretionary review of “small cell” wireless antennas, including equipment, located on existing structures, located on new poles, structures, or non-poll structures. The proposal preempts adopted local land use plans by mandating that “small cells” be allowed in all zones as the use by right, including all residential zones.”

This bill also includes a de facto exemption of [CEQA](#), California Environmental Quality Act, precluding all public consideration “such as aesthetics, nuisance, and environmental impacts of these facilities, all of which are particularly important.”

THE TELECOMMUNICATION INDUSTRY’S GAG ORDER

That’s right. Since 1996, when this telecommunications bill was enacted, a gag order has been placed upon the American people regarding negative health impacts and safety concerns due to cell towers. This is why we have seen such an incredible proliferation of cell towers throughout the American landscape; not because they are safe and do no harm, but because we legally can’t discuss or make decisions based upon the negative health impacts even though The World Health Organization officially classifies electromagnetic radiation a possible 2B carcinogen: The same category as lead, DDT, and styrene.

[Studies](#) have shown that individuals living near these cell towers have measured reductions in serotonin and melatonin levels, threefold increase in cancer, fatigue, sleep disturbance, headaches, concentration problems, depression, memory problems, durability, cardiovascular problems, hearing disruption, skin problems, dizziness, etc. ([Continue Reading](#))

ENVIRONMENTAL HEALTH TRUST (EHT): Devra Davis PhD MPH Delivers Dean’s Lecture at The University of Melbourne on Mobile Phone and Wireless Radiation - Devra Davis PhD MPH delivered the Dean’s Lecture at Melbourne School of Engineering on November 30, 2015 entitled, The truth about mobile phone and wireless radiation: what we know, what we need to find out, and what you can do now. Speaking before the deans of the colleges of engineering medicine and law at the University of Melbourne on Monday November 30, 2015 visiting professor of medicine from the Hebrew University Hadassah Medical Center Devra Davis PhD, MPH revealed stunning new animations showing the greater exposure of the young developing brain to mobile phone radiation. Current standards for mobile devices are nearly 2 decades old, Davis told the interdisciplinary conference.

Prof. Martin Pall – How WiFi & other EMFs Cause Biological Harm (Video)

<http://stopsmartmeters.org.uk/prof-martin-pall-how-wifi-other-emfs-cause-biological-harm/>

PUBLICATION: Electromagnetic fields act via activation of voltage-gated calcium channels to produce beneficial or adverse effects

Martin L Pall: "An understanding of the complex biology of the effects of electromagnetic fields (EMFs) on human/higher animal biology inevitably must be derived from an understanding of the target or targets of such fields in the impacted cells and tissues. Despite this, no understanding has been forthcoming on what those targets are and how they may lead to the complex biological responses to EMFs composed of low-energy photons."
