Running Time: 1:07:28

CORBETT REPORT: Episode 045 – [PTech and the 9/11 Software](#)

**Description:** Indira Singh explains about Ptech, the company with numerous investors and managers with direct links to terrorist financing. Ptech's clients included the CIA, FBI, the White House, the Department of Energy, the Air Force, the Navy, the FAA, IBM and Enron... Yet Singh learnt that **Ptech was a CIA front company** and their software could gain control of the most sensitive computer systems in the country.

# Bush Family Ties to Terror Suspects Re-opened by the 9/11 Classified “28 Pages”

[\(Global Research\)](#) Of special interest to independent researchers is the failure of the nation's air defenses on 9/11, and the reliance of these defenses on the company formerly known as Ptech, which was founded with [funding partly from Saudi financiers](#) with ties to designated terrorist organizations. Ptech employed a mix of foreign nationals and Americans with ties to Israeli software companies with possible links to Israeli Mossad. **Now renamed Go Agile, Ptech is a purveyor of software which is critical to the security of major software systems embedded throughout the FAA and the US Department of Defense.**

Mike Ruppert, in "Summation: Ladies and Gentlemen of the Jury," from Crossing The Rubicon, p.592

*Few have grasped the overall long-term significance of the saga of PROMIS software and what it has become. When I reported on it in October 2000, after meeting with and assisting members of the RCMP's National Security Staff I was aware that - in terms of secret technologies - **PROMIS and its evolutions were the lynchpin of every new military, scientific and financial advance being pursued by the US government and corporate sector.** PROMIS progeny have become the "operating system" underlying data management and data mining for every major technology under development in all arenas of technological advance from medicine, to finance, to surveillance, to battlefield Command, Control and Communications or C3.*

## Implications of 5G technology

**George Webb** - Day 228.1. Hillary's Leakers, Hackers, and Henchmen

NGA Is being combined with NSA and DHS data for a 7x24, geo-spatial surveillance system. Pakistan ISI did it with NADRA for biometric tracking, but they needed the Awan Brothers to get satellite data. Until Nanosat technology came along.
