

## Choose the Professional Year Program in your Own Stream

Australia is amongst the most popular destinations in the world for education and work. Thousands of overseas students graduate here and thousands of recent immigrants take up employment here every year. Australia's atmosphere – both natural and social, has invariably attracted others to live here. However, with the quick paced and dynamic business patterns, it's getting troublesome for overseas graduates to get employment here. They don't have the pre-requisite skills and knowledge that are required for a good job. The corporations don't wish to hire employees who need to be trained plenty before giving actual work. This was an enormous problem for both sides. To tackle this, the Department of Immigration and Border Protection of Australia introduced a plan for overseas students to brush up their skills and knowledge for employment. It's referred to as [Professional Year Program](#).

# Professional Year Program
