bin/do-not-directly-run-secondlife-bin: error while loading shared libraries: libgdk-x11-2.0.so.0:

cannot open shared object file: No such file or directory

\*\*\* Bad shutdown (\$LL\_RUN\_ERR). \*\*\*

You are running the Second Life Viewer on a x86\_64 platform. The most common problems when launching the Viewer (particularly 'bin/do-not-directly-run-secondlife-bin: not found' and 'error while loading shared libraries') may be solved by installing your Linux distribution's 32-bit compatibility packages.

For example, on Ubuntu and other Debian-based Linuxes you might run:

```
$ sudo apt-get install ia32-libs ia32-libs-gtk ia32-libs-kde ia32-libs-sdl
```

\*\*\*\*\*

This is a BETA release of the Second Life linux client.

Thank you for testing!

Please see README-linux.txt before reporting problems.
