

NOTE: DON'T install this mod if you did not follow the DETAILED INSTALLATION for "Skyrim HD". This mod introduces few landscape texture I find to be the only actually improving the vanilla ones without changing them too drastically or reducing the long distance bump effect, therefore if you decided to keep the "Skyrim HD" landscape textures, just skip this mod.

This works for v0.6 of the mod.

Extract the "Better Landscape Textures" textures folder on your desktop.

-From textures/landscape, SELECT ONLY:

"dirtcliffs" FOLDER

"roads" FOLDER

dirtsnowpath01.dds

dirtsnowpath01_n.dds

fieldgrass02.dds

fieldgrass02_n.dds

grasssnow01.dds

grasssnow01_n.dds

snow01.dds snow01_n.dds

snow02.dds snow02_n.dds

snowstone01.dds

snowstone01_n.dds

-Put them in your Skyrim Data/textures/landscape folder, overwrite.

*These are, imho, the only texture files actually worth installing from this mod.
