

Fixing QuickBooks Closing a Payment Processing Account issue

QuickBooks has simple and easy ways for the users to use the account. But we know that there may be a time when you need to close your Intuit QuickBooks payment account, due to some personal reasons.

But after ending with the good memories, some users get stuck with the payment account closing issue. And this issue hits the user's mind and make them annoyed. They face the issues like:

- Providing processed transaction details.
- Calling to the toll-free number.
- Cancellation request.

And much more. The customer has to go through the long way to get their payment account closed. And this can become a headache for them. So you need to resolve the issue, by finding the best possible solution to delete a QuickBooks payment account. As per my experience, nothing could be better than using [contact Intuit Quickbooks support](#) to get the easy ways to close the payment account permanently.

When I had closed my small scale business and I wanted to close payment account. I tried for that, but I was not able to close it. The process started with never ending and irritating question. So I wanted an easy way to complete the deleting process.

I was aware of the fact that QuickBooks provides the support to its customers. But I was not aware of the ways to get the support. I opened the website and then I got to know about QuickBooks support, I opened the support website <https://community.intuit.com> by clicking on it. There I got the easy way to close the payment account.

I used it and finally, I was able to close, the payment account. I loved the support provided by the technical expert. After using the support I got to know about more reliable ways which could help the user to fix the hurdle with some easy ways. The other process is using [contact QuickBooks support phone number](#), where you can get the support to come out of the glitch easily.

This is how you can use the way to help you come out of the glitch easily and close the QuickBooks payment account.
