

New cool functionalities

Thanks to the funds paid by our [Premium](#) users, we were able to develop new cool functionalities, that are currently available only after account upgrade.

1. New feature: You can save note for later - only you will be able to read it until you'll click Publish

The screenshot displays the JustPaste.it web application interface. At the top, there is a yellow header with the logo 'JustPaste.it' and the tagline 'share text and images the easy way'. Navigation links include 'Add new note', 'Popular notes', and 'JustPaste.it'. Below the header, a yellow box prompts users to 'Want to share text with your friends? Paste it below, and give them the link.' followed by a 'More...' link. The main editing area features a rich text editor with a toolbar containing options for Paragraph, Bold (B), Italic (I), Underline (U), Text color (A), and various alignment and list tools. The editor is currently empty. To the right of the editor, there is an 'Additional settings' panel with a 'Photos' section containing 'Upload photos' and 'Manage photos' buttons. Below this, there are expandable sections for 'Custom page name', 'Set content type', 'Protect with password', and 'Import from file'. At the bottom of the settings panel, the language is set to 'English'. Below the editor, there are two buttons: 'Store for later' (orange) and 'Publish' (red). The footer contains the copyright notice '© 2016 justpaste.it' and links to 'Popular notes', 'Premium', 'Terms of Service', 'Blog', and 'About'.

2. New feature: You can delete your notes

3. Ability to change content type of the note is now available also to regular users

If you're a programmer, set Content type to "Source code" to see highlighted code.
