

Truespel Phonetics - for ESL, Grade School, and Beyond

(If you are reading this page printed on paper see it with clickable links at <http://justpaste.it/truespelnow> .)

The Need for Truespel

1. Enhances learning ESL worldwide - see in Korean trials <http://justpaste.it/koreatrials> .
2. Provides Need "phonetics" for USA Common Core k-1 <http://justpaste.it/comcoreenglish> .
3. Enables "phonemic awareness" as per National Reading Panel http://reading.uoregon.edu/big_ideas/

Early Phonetics Does Work - Previous studies prove viability of a "Phonetic First" Reading Approach

1. "Synthetic phonics" is implemented now for K-1 in UK <http://bit.ly/1egMtlg> video
2. 1980's IBM's "Writing to Read" for K-1 with ETS evaluation <http://bit.ly/17frEJc> .

It's Mature

1. Development started in 1986 followed by review and vetting via the internet over the years.
2. USA English has been rewritten (63k words) with a converter at <http://truespel.com/en> .
3. The four truespel books show many applications at <http://authorhouse.com> (keyword "truespel") .
4. The truespel English "pronunciation guide" criteria is given here <http://justpaste.it/truecriteria> .
5. Other English "pronunciation guide" systems don't measure up <http://bit.ly/1twiAeX> .

It's Easy to Learn

1. Truespel is the simplest possible English and keyboard friendly phonetic notation - no special symbols.
2. It can be learned by teachers and literate ESL's in less than an hour. <http://justpaste.it/teachertrain> .

3. See me spell phonetically (which looks like phonics) as I talk at <http://www.screenr.com/GXBN> .

It's Free and Virtual

1. It is internet based and free. Search on "truespel" at <http://youtube.com> .
2. I offer my services for free to teach, quality control, and develop truespel.
3. Training is virtual and free, see <http://justpaste.it/course2> and <http://justpaste.it/teachertrain>

Other Benefits

1. New first time integration of reading instruction, ESL, dictionaries, translation guides and data.
2. New assessment techniques for phonemic awareness (ask students to type what they hear)..
3. New remedial techniques for speech and hearing impairments.
4. New ability to type pronunciation even as you speak <http://www.screenr.com/GXBN>
5. New spreadsheet data techniques for evaluating phonemes (see <http://justpaste.it/17vowels>).
6. New Teacher awareness of how letters relate to phonetics in text (See <http://justpaste.it/ayk>)
7. **[New Truespel Chart of Phonics/Phonetics Frequencies in print](#)**
(See <https://www.screenr.com/m8qN>).

The Future is Yours

1. Teacher development for English phonetics is enabled based on a usable standard.
2. English as the world's lingua franca and a phonetics modeled on it can make all languages pronounceable under truespel.
3. Ancient or dying languages can be written, read and spoken phonetically and preserved.
4. Keyboard unfriendly IPA phonetics can eventually be replaced with truespel See <http://justpaste.it/ipachart>

For truespel implementations let me know how I can help. Truespel is free as my gift for noncommercial use.
