- **GLOBE: VIBER30 to 8080 = 5 days yan (no capping)**
- **GLOBE: TXT10 to 8080 = 2 days (no capping)**
- **TNT: COC10 to 4545 = 3days (no capping)**

GLOBE/TM MGC (4g/lte trick)

- on data at connect mo muna first si vpn sa 3g/hspa.. kpag connected ka na.. try switch to 4g/lte wag mo e dc si vpn... kpag still connected na tpos 4g/lte na .. ok na yan!
- kpag di pren working try mo ulet, off mo data then ulitin ung step.. hanggang mka 4g/lte ka na

Once the file is downloaded, select Open in OpenVPN.

The OpenVPN will ask you to accept the profile available for import, click Accept.

A prompt will appear asking for your Username and Password. Log-in the details of your **BlueVPN** or **GamingVPN** account.

OpenVPN will connect and there will be a green check mark once you have connected. In your notification bar, you should have an ongoing notification while the VPN is active.

Troubleshoot:

- Try another servers (other servers might be offline or under maintenance)
- Make sure you set the correct APN for the desired sim
- Date & Time must be properly synced/set
- Set Network mode to WCDMA only (image below)
