The OpenVPN will ask you to accept the profile available for import, click Accept.

A prompt will appear asking for your Username and Password. Log-in the details of your **BlueVPN** or **GamingVPN** account.

OpenVPN will connect and there will be a green check mark once you have connected. In your notification bar, you should have an ongoing notification while the VPN is active.

Troubleshoot:

- Try another servers (other servers might be offline or under maintenance)
- Make sure you set the correct APN for the desired sim
- Date & Time must be properly synced/set
- Set Network mode to WCDMA only (image below)
