WhatsApp is the no.1 instant messaging app and other instant messaging apps cannot replace it. WhatsApp is the no.1 app that still lacks some features, but does not block its location. WhatsApp is one of the important apps that we use al

most every day and every time to chat with friends or family members or even for official work or business purposes. The app has a simple user interface that makes this app easy for everyone to use.

## JTWhatsApp Mod Apk 2021

WhatsApp is not only used for chatting but also has several other features that send videos, photos, songs, voice recordings, group chats to chat with your friends and family members. It also allows users to make voice and video calls and even hold conference calls for up to four people at a time.

It comes with almost all features, but still lacks features that are not available as customizations and many other features. Therefore, to use WhatsApp with all the features

without hindrance, you need to use WhatsApp mode. There are a number of MODs available in the market and WhatsApp Plus is one of the best MODs. Today here we will talk about WhatsApp + JiMODs (JTWhatsApp) developed by Jimtechs.

JTWhatsApp has taken a step forward with a new anti-ballistic system. This system allows you to use WhatsApp freely even if they know you are using it, they will not be able to remove you. This allows you to use the additional features of the traditional version and with this you will be able to use two WhatsApp accounts through the same Android smartphone.

This allows you to use two WhatsApp accounts with different numbers on the same Android phone. This allows you to use dozens of themes that will change the look of your WhatsApp messaging app. JiMODs lets you change all other elements such as colors, icons, and dimensions. With this, you can increase the number of videos you want to share from 16MB to 30MB. The number of photos you can send in one time from 30 to 90. Now sending pictures via WhatsApp does not reduce the picture size as before. The number of characters assigned to your status increases from 139 to 250. When you chat with your friends, you can see their status. You can hide the last seen and silence, you can see it the last seen by your friends.
