How to Fix QuickBooks Desktop Error 6123

Solution 1: Use QuickBooks File Doctor

QuickBooks File Doctor repairs company file and network issues automatically.

Steps:

1. Download QuickBooks Tool Hub.
2. Open the application.
3. Select Company File Issues.
4. Run QuickBooks File Doctor.
5. Scan and repair the affected file.

Need expert assistance? Contact  [+1 \(866\) 384-9053](tel:+18663849053).

Solution 2: Rename .ND and .TLG Files

Steps:

1. Open the company file folder.
2. Locate .ND and .TLG files.
3. Rename both files by adding .old.

Example:

- CompanyFile.qbw.nd.old

Restart QuickBooks and reopen the company file.

Solution 3: Move Company File to Local Drive

Copying the file locally helps identify network-related problems.

Steps:

1. Copy the company file to Desktop.
2. Open QuickBooks Desktop.
3. Access the copied file locally.

 +1 (866) 384-9053

Solution 4: Disable Antivirus Temporarily

Antivirus software may interfere with QuickBooks file access.

Steps:

1. Disable antivirus temporarily.
2. Open QuickBooks again.
3. Add QuickBooks as an exception.

 +1 (866) 384-9053

Solution 5: Update QuickBooks Desktop

Using the latest QuickBooks version improves compatibility.

Steps:

1. Open QuickBooks.
2. Go to Help > Update QuickBooks Desktop.
3. Install all updates.
4. Restart the application.
