

## My Golden Portrait

Gold Portrait gold is refined in Switzerland to the greatest purity 24K, 999.9 fineness subsequently handed to a second generation of specialized Chinese gold craft artists to record your memory in 24K [gold](#).

The durability and enduring quality on paper as well as in digital format is questionable while modern technology has enhanced the grade of our treasured photographs.

Where would you trust your most treasured memories to, paper, digital format or 24K gold?
