

Unlocking the Path to Ethical Hacking: A Comprehensive Guide to PEN-200

PEN-200, also known as "Offensive Security Certified Professional (OSCP)" training, is a hands-on penetration testing course offered by Offensive Security. It teaches foundational ethical hacking skills, including information gathering, vulnerability assessment, exploitation, privilege escalation, and pivoting within networks. The course emphasizes practical, real-world scenarios, requiring students to think critically and creatively. Students gain access to an extensive virtual lab environment to practice. Completing the course and passing the rigorous 24-hour OSCP exam certifies proficiency in ethical hacking and penetration testing methodologies.
