

## Pin notes on your profile page

Decide which of your notes will show at the top of your public profile page.

We have added new feature called Pinned notes which many of you know already from different websites.

If you will visit your profile page, you can notice that on the right side of your articles there's a new button with pin symbol.

When clicked it will place selected note at the top of the list of articles (after reloading the page). You can pin any number of your notes, this way you can also order them (lastly pinned will be at the top).
