NORMAL MODE

This **is how the mod was designed the first time**

- This version is a little enhance of Rainbow mode.

- With this version, you will find some battles around the Skyrim landscapes.

- This version won't break the gameplay in any way, but could break a little the immersion (depending on your tastes) because of the amount/type of spawns.

- You can use this version while doing quests without problems. Some Quest NPCs could die if you're very unlucky.

Use this version if you think Rainbow Mode is too poor of battles, but you don't want your landscapes excessively crowded!
