

HEROES & VILLAINS

This plugin adds 3 Heroes and 4 Villains in the game

- They have their own life just like you
- They can have a follower
- They can go to work, to hunt or to conquer a fort
- They can eat and sleep in a tavern
- They have multiple routes
- They will recognize your faction, so Villains will be friendly if you are an Assassin or a Thief
- Villains have a small chance to start searching you
- These guys are very powerfull. You will need help to fight them at low levels (or a great escape)

- There is also an "insane" version. Using this, even high level players will have serious problems
- They could kill some quest important NPCs, so use them with caution

Use this plugin if you don't like being the only powerful person in Skyrim!
