

Howdy,

This is a holding blurb until I get around to finish the main site, meantime, [here's a preview of it.](#)

**UPDATE:** I've added '**LOCAL AIRSPACE**' to selected geo-fenced nodes. Good tool for monitoring the skies above a major incident.

**UPDATE2:** I've just added 'Personality Profiling' - its NOT based on my opinion. All the Traits are calculated using an IBM WATSON algorithm. [Here's what #iAWACS churned out during tonights GOP Debate on TRUMP.](#) Anyone can profile anyone else (including me) using the left hand user search and also the one click 'GEOLOC & PROFILE' link on the right hand stream. The original idea was... Active Shooter on the loose - determine whether he wants to go out in flames or negotiate based on profiling his 'distemper' from his Social Media posts, real quick. However I think it's a good tool across the board.

### Where I'm at

I've currently deployed 6 different nodes, and have recently added target user local IP/ISP resolution, 3D helicopter view flyby visualization, and for selected nodes live local EMT/LEA audio.

- - **FIREHOSE** - Unfiltered and sucks up everything - THIS ONE IS INTENSE! **Beware the images tab!**  
>> <http://bit.ly/1PooTI>
- - **DRONEBAIT** - Listens out just for Jihadi Chatter - Access it right here >> <http://bit.ly/1IA9tfQ>
- - **ACTIVESHOOTER** - Listening for Active Shooter situations - Access it right here  
>> <http://bit.ly/1Lzy7V8>
- - **TRENDINGUSA** - Tracks the current US trending Topic. - Access it right here >>  
<http://bit.ly/1Poqc3W>

### LATEST NODES:

- - **MAJOR INCIDENT** - This node activates when there is a major incident in progress and has local EMT audio >> <http://bit.ly/1PAab4O>
- - **DEMO NODE** - Demo node listening for NYPD tweets, LIVE NYPD AUDIO & **NYC Airspace Monitoring**>> <http://bit.ly/20TXfNb>

The idea is realtime - 'Signal Intelligence for Social Media'. Could be pretty handy when there's major incidents or natural disasters, also obviously zeroing into online jihadis. Still a work in progress.

### A RESULT:

Here's a screenshot of the **DRONEBAIT** version snagging a homegrown Jihadi outta Indiana. The GEO footprint shows he travels frequently between Indianapolis and Lafayette >> [RIGHT HERE](#)

**I'm also working on the wrapper site to combine this altogether. It's coming along >> [Screenshot](#)**

Peace.
