

# Why Regulation Matters

Trading can be a very convenient option for several, but there are some reasons why one should not rush into choosing a broker. There are some of the [best CySEC regulated forex brokers in Dubai](#), Cyprus and other countries, to choose from.

Picking a forex regulated broker is indeed an ideal choice and here is why.

## **The difference**

A regulated broker is one whose activities are supervised by a regulatory body. A regulator is a form of oversight whose goal is to detect and analyse market frauds, maintain transparency, and ensure that customers are handled fairly, their investments are secure, and their data is protected.

Non-regulated brokers, on the other hand, have no such supervision. Illegal market operations, such as unjustified commissions, wide spreads, undisclosed Terms and Conditions, and even withdrawal limitations, are made possible. This action has a negative impact on traders and their funds.

## **What CySEC is**

The CySEC licence is one of the most substantial. Individuals can trust firms with CySEC regulation, since it ensures investor and trader safety. The regulator oversees brokerage firms' activities and operations to confirm that they adhere to the administrative and legislative framework's requirements.

## **How CySEC protects**

Verification is critical for brokerages to meet their regulatory and legal duties and to make their relationships apparent to all parties involved. By safeguarding customer information, CySEC can ensure client security.

Financial interactions are a complex subject, which is why a CySEC-regulated broker places a premium on transparency and impartiality. The regulator is in charge of order receiving, communication, and implementation. If brokers do not function legitimately, the regulating body has the authority to apply fines and punishments.

Furthermore, it guarantees that a broker is always available to help customers in any circumstance, including providing you with trading guidelines and a functioning help line to handle any issues they may also have.
