

Safest Cars to Drive in 2022

Each year the Insurance Institute for Highway Safety publicizes its list of safest vehicles for the current year. It got [formed in 1959](#), with the three largest car insurance businesses and 80% of the market. While the IIHS made significant progress in developing safety ratings, it got into The National Highway Traffic Safety Administration started in 1978. A car accident lawyer at [Robert J. DeBry & Associates](#) work with the injured for the best possible litigation outcome.

What Does Safest Mean?

Each year, the NHTSA lists vehicles it will test for safety. The tests use crash dummies to mimic the injuries that would occur to a human. The NHTSA represents the government's involvement with vehicle safety while driving on public streets and highways.

Other organizations like the [IIHS](#) publish independent safety ratings and NHTSA safety ratings. This interaction between a government agency and a private business organization benefits consumers. The safest cars have a list crossover so the same car can be on both lists, facts known by a car accident lawyer. However, the IIHS tests vehicles not on the NHTSA list. These lists matter to drivers who made a purchase based on the lists. These safety ratings are just some of the information used by the car accident lawyer at [Robert J. DeBry & Associates](#) to understand what they mean to accident cases.
