

Improving Provider Interactions with LEP Patients

Slator and GLOBO invite you to our webinar on Improving Provider Interactions with LEP Patients.

- Tuesday, January 14th 2025 at 10am PT / 1pm ET / 7pm CET
- 50 minutes including Q&A

The encounter between healthcare providers and limited English proficiency patients is unique in many ways, including language mediation through an interpreter or by other means, and the addition of diverse cultural contexts. Certain contexts further complicate it, such as the presence of multiple providers in the room, pediatric appointments, psychiatric evaluations, clinical study protocols, and more.

Join us for an insightful discussion about the ways in which consistent guiding principles and standards of practice can help make the provider-LEP encounter more efficient and effective.
