

First Impressions of the iQoo Z7 Pro 5G: Style and Substance

The iQoo Z7 Pro 5G is the latest addition to the company's Z series of [smartphones](#) in India. iQoo is pushing the processor and the design as some of the phone's unique selling points. Armed with a more stylish design than the

, should you be considering the new Z7 Pro 5G as your next mid-range purchase? Here's our initial thoughts on the new 5G smartphone.

The Z7 Pro 5G comes with the typical bundled accessories, and this includes a 66W power adapter and a transparent case. The charging brick is pretty big and has a USB Type-A port. The phone is priced at Rs. 21,999 and Rs. 22,999, for the 128GB and 256GB variants respectively.

The Blue Lagoon color of the iQoo Z7 Pro 5G is quite elegant. It is also available in Graphite Matte. It weighs about 175g and is only 7.36mm thick, providing it a luxury appearance and feel in the hand. Despite its small size, the iQoo boasts a 4,600mAh battery within. The body is also IP52 certified for dust and water resistance.

The other highlight is the processor. The iQoo Z7 Pro 5G features a MediaTek Dimensity 7200 SoC which is built on a 4nm fabrication process and should be very power efficient. iQoo is touting that the Z7 Pro 5G can achieve an AnTuTu (v10) score of over 700K. The phone has 8GB of LPDDR4X RAM and comes in two storage configurations of 128GB and 256GB, both adhering to the UFS 2.2 standard.

The display is likewise of high quality. The iQoo Z7 Pro 5G has a big 6.78-inch AMOLED display with a full-HD+ resolution, two curved edges, and an in-display fingerprint reader. It is also reported that the display has a touch sampling rate of 300Hz and a boosted rate of up to 1,200Hz. It also features a refresh rate of 120Hz. Schott's Xensation Up glass is also used to protect the display from scratches.

The iQoo Z7 Pro 5G runs FunTouch OS 13 based on Android 13, and you get many preinstalled apps. Coming to the cameras, the phone features a 64-megapixel main camera and a 2-megapixel portrait camera, but sadly, misses out on an ultra-wide camera. iQoo has provided optical stabilisation or OIS for the main camera, and the sensor in use is the Samsung GW3. The selfie camera is a 16-megapixel sensor.
