Turn unused internet into money!

TOP - three services for making money on Internet traffic.

Hello dear ladies and gentlemen! I will present to your attention the three best, and really working applications for making money on Internet traffic. After all, the topic of earning

is as relevant as ever, and a couple of extra bucks will never be superfluous. First, let's figure

out what this way of earning is. The services that offer us services of this kind are intermediaries

between large companies such as: Internet agencies, banks, social networks, manufacturers of goods,

analytical and marketing companies, and us sellers, in simple words, we sell our unused Internet,

the intermediary sends power to the customer, the customer pays and we get our percentage.

Now about security, there is an opinion that scares away many newbie sellers, that someone there

will connect to our IP address and do strange things with it, and you risk getting into trouble.

So, this is all a myth that I want to dispel, the projects that I will provide below have their

own security services that cooperate with the police and cyber police. Only those companies that allow

themselves to be identified and sign the necessary agreements have access to our IP addresses!

Any violators are blocked and will not be able to connect to our device or IP address, so the threat

of unauthorized use of your router or smartphone can be eliminated! **A little about profitability,** payment is calculated as follows: for 1000mb of your traffic,

**you will be charged one dollar. Thus, on one device, you will approximately earn from 2 to 5 dollars
per month. The more devices, the higher the earnings.**

And so, let's get down to business.

№1 PEER2PROFIT

This service, in my opinion, is the best of the best, and I have several reasons for this.

1) Withdrawal limits. Peer2Profit offers us a withdrawal in many ways: these are bank cards, external wallets and in cryptocurrency. The minimum payout can be ordered by accumulating only 1$.

This payout is available through the Litecoin LTC payment system.

2) Peer2Profit allows us to connect up to ten devices to one account, which is very good.

3) Referral program, this service offers us 50% of the income from each referral you invite.

Of the minuses: there is no application optimized for the IOS platform.

iPhone owners will not be able to earn, maybe in the future such optimization will appear.

All other platforms work great. To start earning on Peer2Profit, you need to do three simple steps:

Registration: You will need to enter your mail and come up with a password, after which you will

receive a confirmation letter that you will need to open and confirm the relevance of your mailbox.

Installation: After registration, you will be taken to the main page of the site, at the top of the

site you need to click on "Download / install", then select the platform for your device and download the application. Installation is standard and will not be difficult, the whole process will take a few minutes.

Authorization: After installation, you need to launch the application and enter the data that you

used during registration, mail and password. To register follow the link -

№2 HONEYGAIN

The second place in our top will be occupied by Honeygain, this is the same as the previous one,

a unique system for monetizing Internet traffic. Honeygain credits new users with $5 as a gift to

their account, for this they need to accept a referral invitation. There is a withdrawal limit, in order to request a payout from the main wallet, you need to earn +15$ more since the minimum

payout is from $20. After that, you can switch to an additional JumpTask wallet where you can exchange the earned dollars for the JMPT token. With this wallet, the withdrawal limits are much lower. Also in Honeygain there is a free lottery Lucky Pot, in the form of a barrel of honey,

which can be opened once a day and win from 10CR to [10000CR= 10$] There is a referral program of

10% of the income from each referral. Honeygain only allows you to connect two devices to one
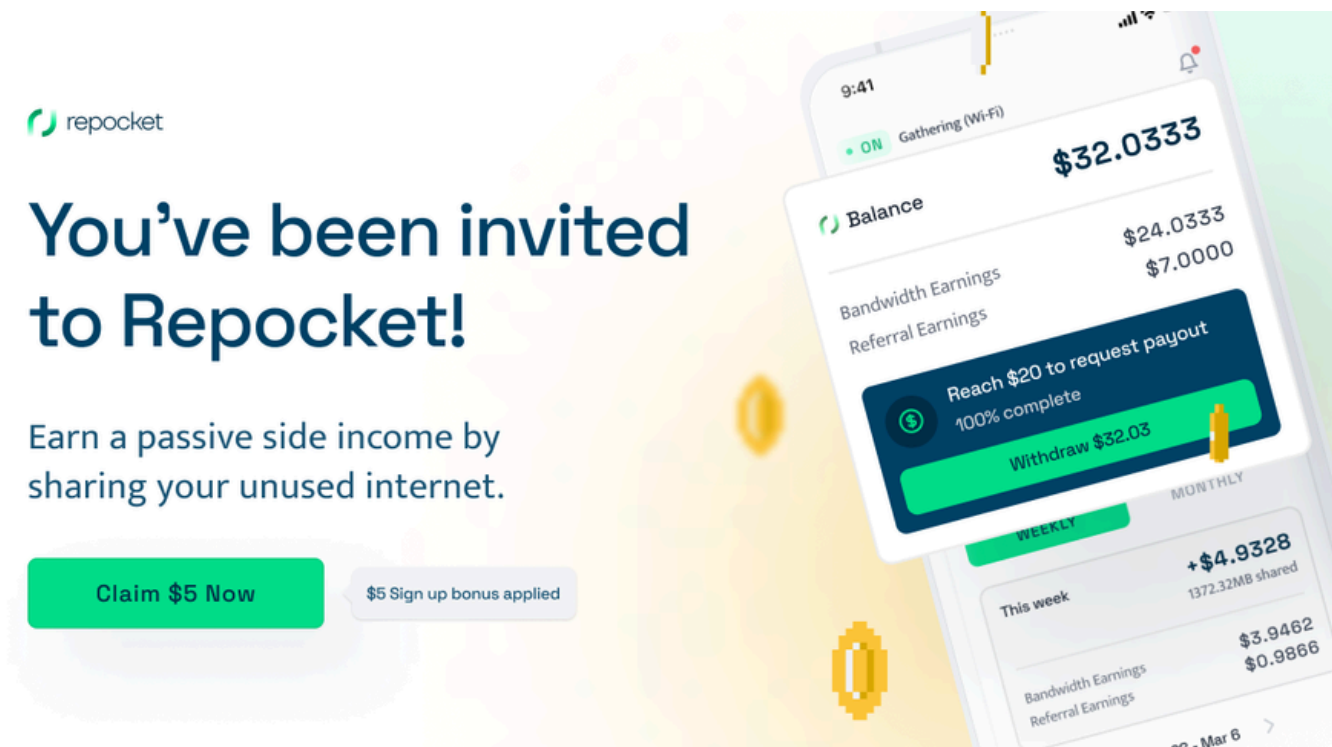

ip address, if more, they may consider it a scam and you risk getting banned. To join: you need

to
register, confirm your mail, then you can download the application on the main page of the site
in the upper right corner, log in and run it on your device. Register here -
http://honeygain.com

№3 REPOCKET

In third place is Repocket, a similar service to the previous Honeygain.
Also, a $5 gift is provided for new users, the only thing that distinguishes them is that there
is no lottery here, but instead of it, in the Other tab, you can complete tasks in the form of polls
and games, for which you will also be awarded a reward. To join, everything is as always -
register,
confirm the mail, download the application and run it on your device.
You can download the application on the main page of the site in the upper left corner.
Register here - **http://repocket.com**

And for dessert...

№4 BSPIN

For those who like to spin slots. Meet Bspin Crypto Casino.

You must have wondered - what is it doing here in this article?...

Answer: This gaming club is here because it has a CRYPTOCRANE! What is a crypto faucet - this is

a special service that allows you to receive free cryptocurrency for completing simple tasks.

This casino did not spend huge amounts of money on advertising, but instead they give the opportunity

to all their users to earn some money on the game with the help of a crypto faucet. You will find

it in the "Backpocket" tab, then "Satoshi Pocket" for the simplest task with the passage of the

captcha, you can withdraw 0.30uB = 30satoshi every 20 minutes. The faucet works without restrictions

24/7 and having collected some amount, you can try your luck at rates from 0.10uB and higher.

The casino uses licensed software and is controlled by the Curosao licensor.

Don't forget that gambling is addictive, play responsibly! You can join the gaming club here -

http://bspin/backpocket.com

This is where I will end my article, but I want to add one more thing...

In the sale of Internet traffic, your profit depends on the country where you live,

the city and the provider. And your success comes from you, from your desire to develop and move

forward. For correct operation, you need an Internet connection with a speed of at least 50 Mb / s.

For those who will use applications on a PC, I recommend that you check the box "start with

Windows"

in the settings, otherwise after a reboot, you will need to start again.

All success, profit and good luck!
