

Video Remote Interpreting

VIDEO REMOTE INTERPRETING

Convenience is important to us, which is why TCS Interpreting and Captions offers professional Video Remote Interpreting (VRI) services. A member of our **expert team** will be able to provide American Sign Language (ASL) services across video feeds, breaking down communication barriers.

WHAT IS VIDEO REMOTE INTERPRETING?

With Video Remote Interpreting services, you get all the benefits of an **on-site interpreter**. The only difference is they do not have to be present at the event's location. Our highly trained professionals will join the event through a video call, and provide their services in a live feed.

WHAT ARE THE BENEFITS OF VIDEO REMOTE INTERPRETING?

Video Remote Interpreting services provide many useful benefits for organizations and businesses ready to raise the bar. Some of these include:

Fast Response Time

One of the most convenient aspects of VRI is the fact that interpreters do not have to be in the same room – or even in the same state – as the event. This means there will be a much faster response if an interpreter is needed on shorter notice.

Accurate Translations

TCS Interpreting and Captions employs those who are experts in ASL, meaning you can expect nothing but accurate translations throughout your event.

ARE YOU IN NEED OF VIDEO REMOTE INTERPRETING?

Are you a business or organization that needs ASL interpreting for your next meeting, event, or conference? TCS Interpreting and Captions is here to help. Contact us today to request our services.
