### Forklift Training - What to prepare for on Your Forklift Test

Before you go over a forklift training program you need to do need to find out what will you become skilled at. An excellent course have a training plan and may incorporate the following:

Pre Shift / Pre operational checks

Workplace Hazards

Safe operation of an Forklift

Training routines ability to drive

Attachments

Refuelling

General protection

Racking, pallets, roll cages, handling symbols

The Forklift Assessments theory and practical

Before a Practical Assessment can occur you have to have received formal training and have completed the Forklift Theory Assessment. Once that is completed then you definitely can attempt wise assessment. A forklift operator should be trained and support the relevant Certificate of Competency to operate a forklift in the workplace.

### Forklift Check

Prior to deciding to drive the forklift you should check it to ensure it can be safe to use, the forklift can be a dangerous machine when it is faulty or maybe if the operator does not understand fully the way you use it.

Look at operators manual and manufacture's handbook before wanting to complete the checks needed and to familiarise yourself together with the aspects of your forklift.

The primary intent behind pre operational checks:

- ❖ Identify and report damage or faults
- ❖ search for leaks
- ❖ Prevent accidents
- ❖ Keep up with the forklift

Making sure that the forklift is within a good area, faraway from pedestrians and overhead obstructions, you'll be able to split the checks into three sections-

1. External check
2. Internal check
3. Operational check

### Forklift Test

Precisely what is mixed up in Forklift Test? Exactly what are they getting me to complete?

Regarding the Forklift Test, I will try and make it simple and simple to be aware of.

Before a candidate can to get a practical test they need to have finished their structured training and on the job training documented inside a log book and signed off by a licenced Supervisor.

Think of the forklift test in three parts:

#### Element 1

- ❖ Pre Operational Check of the Forklift Truck.
- ❖ Inspection from the work site
- ❖ identification of work site hazards and the selection of control measures
- ❖ Checking controls on Equipment

#### Element 2

- ❖ Operation of Forklift Truck, such as movement of assorted loads, pick-up and placement of loads from low, medium and high level racking
- ❖ Shifting & Stacking Loads
- ❖ Loading and Unloading

#### Element 3

- ❖ Correct turn off and parking process of Forklift Truck.
- ❖ Securing the site

You'll be asked some questions either during or following your assessment to create the reason why to your decisions and actions.

Don't be frightened because assessor use their discretion in assessing competence under each criteria.
