

What Is The Function Of SAP SCM?

SAP SCM, or SAP Supply Chain Management, is a software solution developed by SAP SE that helps companies manage their supply chain processes effectively. The primary function of SAP SCM is to enable companies to plan, optimize, and execute their supply chain operations, including procurement, production, inventory, logistics, and distribution.

SAP

The banner features a dark blue background with a glowing laptop in the center-right. The laptop screen displays a software interface. Below the laptop, the word 'SAP' is written in a large, stylized, glowing font. In the top left corner, there is a logo for 'CROMA CAMPUS' and the text '#1 Asia's Technical Training Institute'. In the top right corner, there is a small white icon of a person.
