

Although WhatsApp provides several useful features, such as emojis, GIFs, and the ability to delete messages, the instant messaging network does not enable users to schedule chats. If a user recalls to ping someone in the wee hours, he or she will either have to remember to do it the following morning or do it right then, because the app does not offer a function to schedule it.

While many applications on the market claim to perform the job flawlessly, [Auto Whatscheduler: Schedule WhatsApp Message App](#) allows you to schedule your messages whenever you want. With whatscheduler, you can rest guaranteed that it will function as efficiently as possible.

Sit and send text messages to multiple individuals on the dates you choose without missing a beat.

This WhatsApp Scheduler app allows you to schedule messages with your WhatsApp connections.

Supports WhatsApp & WhatsApp business

- Add Contact: Select your contacts from WhatsApp messenger
- Select Date: Add a date on when you want to auto-send a message
